

self-dual five-forms

dim 126, Lorentzian frame

$$S_{ab} = \frac{1}{5!} F_{\mu_1 \dots \mu_5} \Gamma_{ab}^{\mu_1 \dots \mu_5}$$

gamma-traceless Sym^2

dim 126, null frame (5,5)

←-----
verified left inverse

anti-self-dual $\rightarrow 0$ (kernel equals the 126, by span equality)

exact over $\mathbb{F}_p$; no tolerance anywhere
